

Prerequisites :

.NET framework 4.0 has to be install on deployment machine

Steps to be followed for the Spine\_Attendance\_Recalc

1.) Create a directory SpineDailyAttenRecalc in any of the drive.

for example : D:/SpineDailyAttenRecalc

2.) Copy the files list mention bellow

DailyAttenRecalc.exe

DailyAttenRecalc.exe.config

MySql.Data.dll

SpineAttendance.dll

SpineCommon.dll

SpineCommonLib.dll

SpineDBCommon.dll

SpineEssData.dll

SpineHREss.dll

SpineUserSetup.dll

SpineWorkFlow.dll

WebConnection.dll

ClearLog.bat

InstallDailyAttenRecalc.bat

UnInstallDailyAttenRecalc.bat

3.) Set the parameters for the DailyAttenRecalc.exe.config

3 a) Set the connection strings (for OLEDB Provider) settings in DailyAttenRecalc.exe.config

dbAdminConn : Source database which defines the HRMS/Payroll database connectivity (DBADMIN Database)

for Example : Provider=SQLOLEDB;Data Source=MyServer;Password=userpass;User ID=username;Initial Catalog=C001

3 b)LogPath : User can set the Log File path

for example : D:/SpineDailyAttenRecalc

4 a) In InstallDailyAttenRecalc.bat, modify the parameter for InstallUtil.exe

for Example : InstallUtil.exe /i "D:\SpineDailyAttenRecalc\DailyAttenRecalc.exe"

Also set the value for PATH variable

for Example : "D:\SpineDailyAttenRecalc"

4 b) In UnInstallDailyAttenRecalc.bat, modify the parameter for InstallUtil.exe

for Example : InstallUtil.exe /u "D:\SpineDailyAttenRecalc\DailyAttenRecalc.exe"

for Example : "D:\SpineDailyAttenRecalc"

5.) Run the Spine\_Attendance\_Recalc service from the

Control Panel -> Administrative Tools -> Services
