

Prerequisites :

.NET framework 4.0 has to be install on deployment machine

Steps to be followed for the Spine_Attendance_Service and Spine_Attendance_Recalc

1) Create a directory SpineServices in any of the drive.

for example : D:\SpineServices

2) Extract "SpineServices.zip" in SpineServices directory

3) Set the parameters for the ConConfig.config

3.a) Copy "ConConfig.config" file from D:\SpineServices\ConfigFile Folder and keep in D:\SpineServices\

3.b) Set the connection strings (for OLEDB Provider) settings in ConConfig.config
dbAdminConn : Source database which defines the HRMS/Payroll database connectivity (DBADMIN Database)

ForExample:Provider=SQLOLEDB;DataSource=MyServer;Password=userpass;User
ID=username;InitialCatalog=DBADMIN

4)Copy "SpineDailyAttenAPI.exe.config" file from D:\SpineServices\ConfigFile Folder and keep in D:\SpineServices\

4.a)Set the parameters for the SpineDailyAttenAPI.exe.config

4.b)keep "connectionStrings" value as it is

4.c)ExecutionDelay: User Can set service run intervals in minutes or seconds
for Example :30 (e.g 30 for thirty mins)

4.d)LogPath : User can set the Log File path

for example : D:\SpineServices\SpineDailyAttenAPI

5) In InstallDailyAttenAPI.bat, modify the parameter for InstallUtil.exe

for Example : InstallUtil.exe /i "D:\SpineServices\SpineDailyAttenAPI.exe"

Also set the value for PATH variable

for Example : "D:\SpineServices"

To create services click on InstallDailyAttenAPI.bat with admin rights

6) In UnInstallDailyAttenRecalc.bat, modify the parameter for InstallUtil.exe

for Example : InstallUtil.exe /u "D:\SpineServices\SpineDailyAttenAPI.exe"

Also set the value for PATH variable

for Example : "D:\SpineServices"

To remove services click on UnInstallDailyAttenRecalc.bat with admin rights

7) Run the Spine_Attendence_Service service from the

Control Panel -> Administrative Tools -> Services

8) Copy "DailyAttenRecalc.exe.config" file from D:\SpineServices\ConfigFile Folder and keep in D:\SpineServices\

8.a) Set the parameters for the DailyAttenRecalc.exe.config

8.b) keep "connectionStrings" value as it is

8.c) LogPath : User can set the Log File path

for example : D:\SpineServices\DailyAttenRecalc

9) In InstallDailyAttenRecalc.bat, modify the parameter for InstallUtil.exe

for Example : InstallUtil.exe /i "D:\SpineServices\DailyAttenRecalc.exe"

Also set the value for PATH variable

for Example : "D:\SpineServices"

To create services click on InstallDailyAttenRecalc.bat with admin rights

10) In UnInstallDailyAttenRecalc.bat, modify the parameter for InstallUtil.exe

for Example : InstallUtil.exe /u "D:\SpineServices\DailyAttenRecalc.exe"

Also set the value for PATH variable

for Example : "D:\SpineServices"

To remove services click on UnInstallDailyAttenRecalc.bat with admin rights

11) Run the Spine_Attendance_Recalc service from the

Control Panel -> Administrative Tools -> Services
